GLOBAL EQUITY ABSOLUTE RETURN (GEAR)

Investment Thesis

- ✓ GEAR is a geography agnostic, multi-asset portfolio which invests predominantly in global equity. It is focused on capturing global market investment opportunities in companies with undisputed leadership and attractive financial metrics at price points of downturn distress.
- ✓ GEAR is 30-35 holdings portfolio which follows a holistic process of stock screening using quantitative financial metrics combined with individual stock picking using fundamental analysis and timing using technical indicators.
- ✓ GEAR is an ideal 10+ years horizon wealth creation portfolio of companies which are in “good to great” – “mid-to-mega” trajectory with 25 X 25 potential accumulated using technical, fundamental & quantitative methods.
- ✓ GEAR opportunistically buys Alternatives through ETFs and REITs to diversify across geographies, currencies and countries based on new world order opportunities.

INDIA EQUITY - GROWTH AT A REASONABLE PRICE (GARP)

Investment Thesis

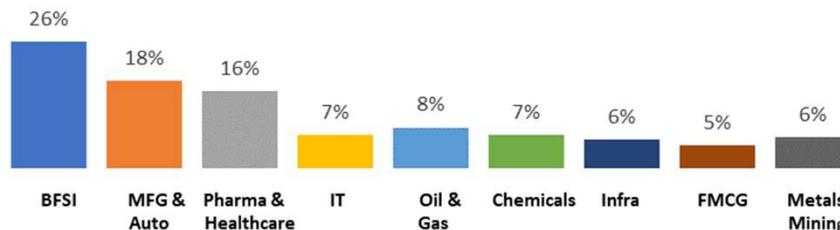

- ✓ From the lens of an International Investor, India is an emerging market with attractive demographics (educated, young, consuming population with infrastructure deficit) and GDP growth potential of 8-10% for the next 2 decades. There are several factors which prevent India from realizing its full-potential, nonetheless there are 40-50 consumer facing companies in India which reap rich dividends of having the right product for the right market at the right price, thus have a predictable secular growth rate of 20% for 10 years to come.
- ✓ GARP focuses on a 50 stock portfolio, which have been accumulated at a distress pricing. GARP is an ideal retirement oriented portfolio holding on high-quality, growth oriented companies bought at a reasonable price by taking advantage of market downturns. GARP endeavors to identify companies which are in good to great trajectory with 25 bagger potential over 25 years horizon using technical, fundamental & quantitative methods.
